Single sheet, printed on both sides. MPIB (Mass Psychological Inoculation Bureau) Special Bulletin No. 1. \$35.00

This document asserts that the "National Security Council under orders from Vice President Nelson A. Rockefeller has now commenced an insurrection which is scheduled to conclude with Gerald Ford's assassination during the last week

of January of the beginning of February." If that isn't enough we read a few paragraphs later that a "general thermonuclear exchange will incinerate this planet sometime in January or February." Armageddon can only be averted if the "entire United States population matures sufficiently within these next four to six weeks to follow the instructions that the USLP will be issuing during this emergency."
